# 01 Introduction Bluegrace Energy Bolivia SRL

We are an association of experts and professionals from around the world with years of experience in the energy sector, with the common goal of making a valuable contribution to the global energy transition towards a net zero future. Witnessing the alarming effects of climate change and the challenges facing societies on their path towards sustainability, we conceived **BLUEGRACE ENERGY BOLIVIA SRL** as a platform from which we could coordinate our efforts in our mission. Our experts stand out in both clean and renewable energy and have decades of experience leading innovative projects in the field of energy transition towards a model “fit for the challenges of the 21st century”. At Bluegrace, we adhere to the common principles of professional expertise, the highest integrity, and creating real value in both business and society.

# 02

## Background Bluegrace Energy Bolivia SRL

With the signing of the United Nations Framework Convention on Climate Change (UNFCCC) that entered into force on March 21, 1994, which has as its ultimate objective the prevention of dangerous human interference in the climate system; the Kyoto Protocol (KP) which was approved on December 11, 1997 to reduce greenhouse gas emissions; Since the Paris Summit has the objectives of combating climate change and accelerating and intensifying the actions and investments necessary for a sustainable future with low carbon emissions, mechanisms were established to prevent and proceed on human actions that accentuate climatic imbalances. The awareness that above particular interests is our planetary belonging giving an impulse towards sanity and efficiency. Bolivia, after the Paris Summit, enacts Law 835 for the application of the terms agreed at this Summit.

- **Climate Change**, are alterations of the planet's climate caused by atmospheric warming that bring consequences ranging from economic calamities to humanitarian tragedies.
- **Global Warming**, are changes in the planet's temperature that are assumed to be caused by excessive accumulation of Greenhouse Gases - GHG.
- **Greenhouse gases are atmospheric** gases that are accumulating excessively due to human causes. These are, among others: water vapor (H<sub>2</sub>O), carbon dioxide (CO<sub>2</sub>), nitrous oxide (N<sub>2</sub>O), methane (CH<sub>4</sub>) and ozone (O<sub>3</sub>). Called by the acronym GEI.

# 02

## Background Bluegrace Energy Bolivia SRL

- **The Kyoto Protocol**, an agreement emanating from the United Nations Framework Convention on Climate Change (UNFCCC), ratified by the Paris Agreement that aims to reduce concentrations of Greenhouse Gases to levels of the Pre-industrial Era.
- **Carbon sinks**, means geographic locations that absorb and store carbon from atmospheric CO<sub>2</sub>.
- **Voluntary Carbon Market:** This initiative is to generate carbon titles oriented to the voluntary (unregulated) market. Voluntary projects are usually highly valued for their social and environmental benefits, since they have to do with the livelihoods of the population and with the protection of important ecosystems. Carbon credits on the voluntary market are called Verified Emission Reductions (VERs).

- **Secondary Financial Market:** The secondary market or trading market is a part of the capital financial market dedicated to the purchase and sale of titles and securities that have already been issued by companies or individuals. It is the best way to obtain the necessary capital from the financial market to finance long-term investments and projects. In the secondary market, titles or securities are bought and sold among different investors or used as collateral to obtain liquidity that is then used to generate more capital through financial strategies.

# 03 Goals Bluegrace Energy Bolivia SRL

## 3.1

### GOALS

The object and purpose for the Commercial Company **BLUEGRACE ENERGY BOLIVIA S.R.L.** It is fundamentally based on consolidating a lasting inter-institutional relationship over time, with mutual cooperation with the Indigenous Regions of Bolivia, to generate and attract economic resources from the Certifications of Titles or Carbon Bonds that will mainly benefit all the participating communities and thus achieve the strengthening of collective social support. For this, the Commercial Company **BLUEGRACE ENERGY BOLIVIA S.R.L.**, will cooperate in the management of attracting resources based on a financial economic strategic plan that allows the implementation of social and productive development projects that have a social and economic impact in favor of the Indigenous Regions, their communities and their families. These actions will make it possible to face the new challenges of society with the improvement and generation of development for "living well" with good health, preservation of natural resources and care for the environment (implementing non-invasive practices, respecting the language or dialect, the culture, religion, uses and customs of native peoples and places of intervention).

In this understanding, **BLUEGRACE ENERGY BOLIVIA S.R.L.**, will manage with the national and international organizations, the necessary resources for the preparation, elaboration, implementation and execution of the different projects and programs for the benefit and development of all the Indigenous Regions, but fundamentally with the vision of preserving natural areas declared intangible heritage of humanity and natural lung of Latin America and the world for its extensive virgin territory.

## 3.2

### BENEFICIARIES

The beneficiaries of the projects to be implemented by **BLUEGRACE ENERGY BOLIVIA SRL** are the set of Communities and Indigenous Peoples of the intervention areas.

## 3.3

### EXPECTED RESULTS

With a territory intervened in its **FIRST PHASE** of 8,313,005.83 Hectares, it is intended to achieve forest certification to achieve the conservation and/or restoration of the territories and native

# 03 Goals

## Bluegrace Energy Bolivia SRL

### Business items

fauna turning them into Protected Nature Reserves, carrying out soil conservation practices, sources and watercourses; through a forest and environmental management plan for forests through the placement of Carbon Titles in a Secondary Financial Market in order to obtain economic profitability for the Commercial Company and the Communities to intervene, which will be translated into program execution and projects until we reach our final goal with the intervention of the subsequent phases.

## 3.4

### PRIORITIZATION AREAS

- The care, preservation and conservation of the environment and the ecosystem of the native forest, reducing the concentration of Carbon Dioxide in the atmosphere.
- Assisted recovery and restoration of areas affected by forest fires, promoting sustainable development.
- Forest management plans and technical training that educate in controlled burning techniques for subsistence food crops.
- The sustainable productive development of the Indigenous Communities for the generation of sources of employment, improving the quality of life of the inhabitants.

- Strengthening of agricultural, livestock, productive, artisan, community carpentry, recovery of secondary products, artisan exhibition and sales programs.
- Implementation of community radio stations.
- Ecotourism circuit, to boost the economy of the inhabitants.
- Implementation of leather goods workshops.
- Construction of natural medicine medical centers, promoting the implementation of nurseries for the recovery of medicinal plants typical of the area.
- Strengthening of governance and comprehensive sustainable development, based on democratic community participation and gender equity.
- Access to free Health and Education for all the inhabitants of the region, without any discrimination.
- Manage projects for decent housing with extensive facilities for its accessibility.
- Drinking water and electricity as basic services.
- Road accesses that allow an adequate link between communities, for the commercialization of their products.
- Support for the organizational strengthening of the INDIGENOUS ORGANIZATION and its Communities, as an organic structure.

# 04 Execution Schedule Bluegrace Energy Bolivia SRL

We must consider SIX STAGES in the process:

# 04 Project Stages Bluegrace Energy Bolivia SRL

## FIRST STAGE

1

### PRE-FEASIBILITY

It implies the visit and/or tour community by community for the socialization of the project, this part is of the utmost importance since the Indigenous Communities will become our strategic allies when preserving and caring for the areas of intervention.

## SECOND STAGE

2

### FEASIBILITY

It implies a previous study to determine the possibility and measure the possible production of environmental services that the forest can provide, commonly called carbon sinks, these are places that absorb and store carbon from CO2.

## THIRD STAGE

3

### PROJECT

Once the precise location is known (coordinates and satellite images), we proceed to study the eco-systemic potential and accurately determine its volume and yield. Commitment to NOT DEFOREST.

## FOURTH STAGE

4

### ISSUE

The project is registered, the pertinent reports are issued and the VOLUNTARY Carbon Certificates or VER's are generated. Considered as CARBON TITLES. They are also referred to as Carbon Bonds, Green Bonds, CCC Carbon Credit Certificates, CER's and VER's.

## FIFTH STAGE

5

### MAINTENANCE

Based on the Forest Management Plan and local legislation, a plan will be developed that includes periodic controls and audits, the issuance of reports and the implementation of protection actions that do not have a negative impact on the forest.

## SIXTH STAGE

6

### FINANCIAL PLACEMENT

The face value of the certificate is obtained by multiplying the tons of CO2 equivalent by the value of the unit or Tn. CO2, which is regulated by global supply and demand and whose value has had an upward trend in recent years.

## Agreements and Accreditations Bluegrace Energy Bolivia SRL

### AGREEMENT SIGNED BETWEEN BLUEGRACE ENERGY BOLIVIA SRL AND THE CIDOB - CONFEDERATION OF INDIGENOUS PEOPLES OF THE EAST, CHACO AND AMAZONIA OF BOLIVIA

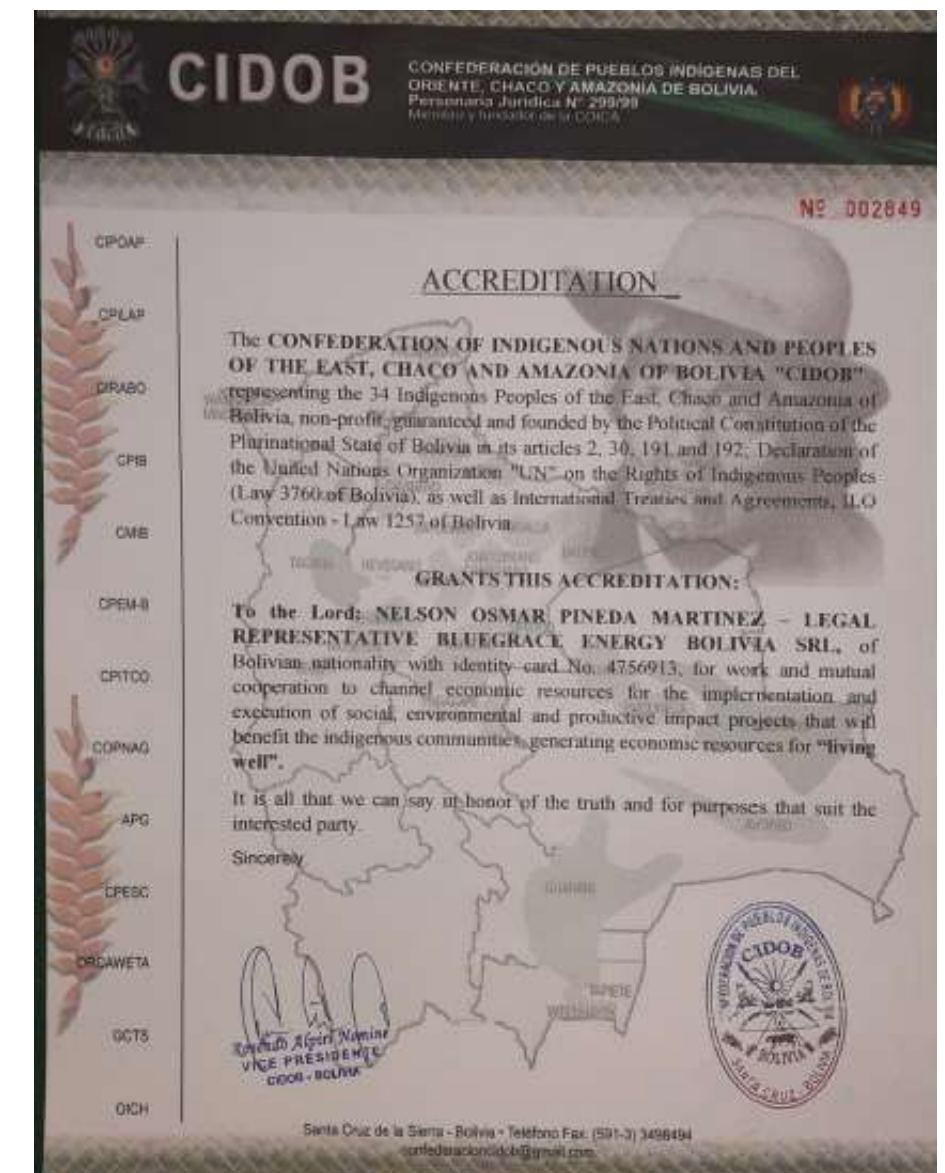

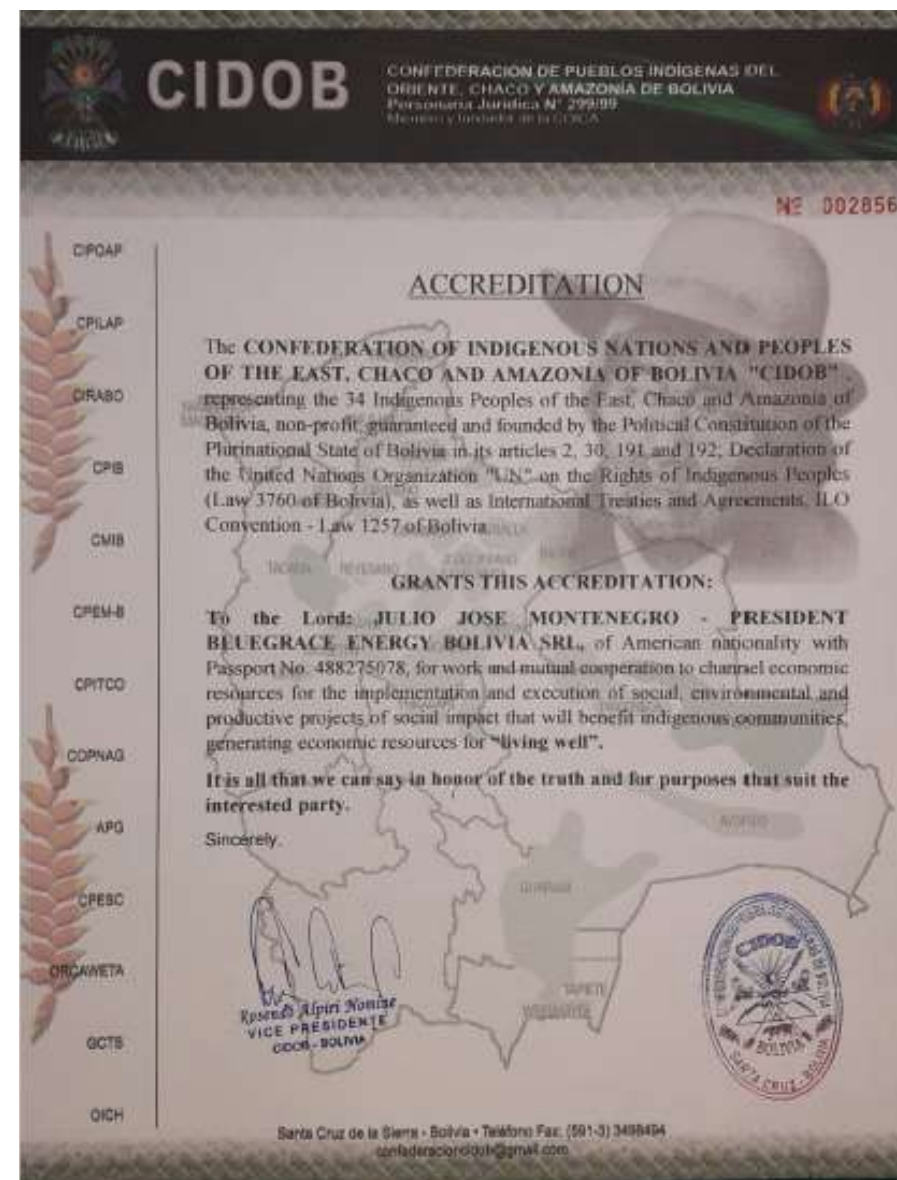

The **CONFEDERATION OF INDIGENOUS PEOPLES OF THE EAST, CHACO AND AMAZON OF BOLIVIA - CIDOB**, was founded in October 1982, in Santa Cruz de la Sierra, in November 1998, at the 11th Great National Assembly of Indigenous Peoples (GANPI), which it was held in the city of Camiri, where the **34 indigenous peoples**, the same ones that make up CIDOB, participated. These peoples inhabit the entire Tierras Bajas region, that is, in **7 of the 9 Departments that make up the country (Santa Cruz, Beni, Pando, Tarija, Chuquisaca, Trópico de Cochabamba and North of La Paz)**. The regional organizations already consolidated and strengthened are: **CPIB** Central of Indigenous Peoples of Beni, **CIRABO** Central Indigenous of the Amazon Region of Bolivia, **CPESC** Central of Ethnic Peoples of Santa Cruz, **APG** Assembly of the Guaraní People, **ORCAWETA** Organization of Weenhayek and Tapietés Captaincies, **CPILAP** Central of Indigenous Peoples of La Paz, **CPITCO** Central of Indigenous Peoples of the Cochabamba Tropics, **CIPOAP** Central of Indigenous Peoples of the Amazon of Pando, **OICH** Chiquitana Indigenous Organization, **CPEM-B** Central of Mojeños Ethnic Peoples of Beni, **CMIB** Central of Women Indigenous Peoples of Beni, **COPNAG** Central of Organizations of the Guarayos Native Peoples, **GCTS** Great Tsimané Council.
